

## quickcharge—the Same Simple System, with the Benefits Multiplied

You know the value **quickcharge** brings to your hospital cafeteria—shorter lines, more convenience, increased revenue, and employee satisfaction. Plus the productivity benefits in payroll—reduced processing of hard-to-read payroll deduction slips.

Now you can increase these benefits by using *quickcharge* throughout your hospital. Here's how:

### Add New Locations

Increase employee convenience and reduce burden on payroll processing when you add *quickcharge* to gift shops, coffee stands, pharmacies and other points of sale your employees use.

### Install on Vending Machines

Employees don't always have time to walk to the cafeteria when taking a break or needing a snack. Plus what about late shift employees who work when the cafeteria is closed? Add *quickcharge* to vending machines and everyone benefits from cashless purchases. All your employees, even the late night staff, can enjoy the ease and convenience of *quickcharge*.

### Extend Beyond Employees

Every hospital has doctors and other professionals on site who don't carry employee badges. Now you can give them access to *quickcharge* and reduce the number of free meals provided, ensure fairness and compliance, and increase revenue. Set up a pre-pay system or send bills at the end of the month to non-employees who use *quickcharge*.

**quickcharge—the same simple system, the benefits multiplied.**

**"Employees want **quickcharge** everywhere!  
It has been a satisfier and then some."**

Tom LaMonaca, Director of I/S Systems Development,  
Albert Einstein Healthcare Network, PA

**"The **quickcharge** vending option is great! It's been so successful over the last few months that we've decided to expand it to all of our other locations."**

Rita Disher, Director of LGH Volunteer Services,  
Centra Lynchburg General Hospital, VA
